**BRISBANE PROCEDURE CENTRE**

Initial and Final Assessment for compliance to  
NSQHS Standards (Second Edition) for  
New Hospitals

**Team Leader:** Rhonda Williams

**Date of Assessment:** April 7 and 8, 2021

**Project Number:** PRJC-225666-2021-AST-AUS

Client: Brisbane Procedure Centre	Assessment Dates: April 7-8, 2021
Assessment Report: NSQHS Standards	PRJC-225666-2021-AST-AUS

### CLIENT INFORMATION

Client:	Brisbane Procedure Centre		
Client Contact:	Fiona Ferrier	Email: <a href="mailto:fionafferrier@cityfertility.com.au">fionafferrier@cityfertility.com.au</a>	
Position:	National Compliance, Regulatory and Safety Manager	Phone: 07 3058 9610	

### AUDIT DESCRIPTION

Standard	National Safety and Quality Health Service Standards Second Edition			
Assessment Type	Interim (New Hosp) <input checked="" type="checkbox"/>	Accreditation <input type="checkbox"/>	Follow-up <input type="checkbox"/>	Final Assessment <input type="checkbox"/>
Initial Assessment Date	April 7 and 8, 2021			
Final Assessment Date	April 7 and 8, 2021			
Duration	Onsite: 2 days			
Assessed Site	42 Doggett Street, Newstead QLD 4006			
Assessment team	Lead Assessor	Rhonda Williams		
	Team member	Amanda Ginger (8 <sup>th</sup> April only)		
	Observer	N/A		
Organisation type	Hospital with multiple shifts?	<input type="checkbox"/> (see shift sampling below)		
	Day Procedure Services with multiple shifts?	<input type="checkbox"/> (see shift sampling below)		
	Day Procedure or other service with single shift only?	<input checked="" type="checkbox"/>		
Shift sampling:	Total Number shifts: 1	Shifts sampled: 1	N/ A	<input type="checkbox"/>
Previous accreditation details:				N/ A <input checked="" type="checkbox"/>

### ACCREDITATION INFORMATION

Scope of Accreditation: For the Provision of IVF and Gynaecology Services			
Non-applicable actions requested and approved: 1.2, 1.4, 1.32, 1.33, 2.13, 4.6, 4.12, 5.9, 5.15, 5.16, 5.18, 5.19, 5.20, 5.27, 5.28, 5.29b, 5.32, 5.34, 5.35, 5.36, Std 7.			
Health Facility Registration Details: QLD Health Licence QDH0611/20 expiry 30/9/2021 Poisons Licence: included in licence			
EA Code: 38	Employee Numbers: 6	Licensed Beds: 3 Stage 1 bays	
Changes in Client Information at this Assessment

## EXECUTIVE SUMMARY

An initial assessment of **Brisbane Procedure Centre** Management System was conducted on the above dates by DNV in accordance with the requirements outlined in Health Care Services (HCS) Scheme Issue 3 2019 and the requirements of the Australian Commission on Safety and Quality in Health Care (Policy November 2019).

### Assessment Objectives

The purposes of the assessment were to verify compliance of the safety and quality system and associated procedures and practices to the requirements of the NSQHS Standards and to ensure that the management has a system in place to identify applicable legal, statutory and contractual obligations.

### Summary of Assessment Methodology

Methodology used to conduct the assessment was through sampling of the organisation's records, documented procedures and processes, observed practice and/or interviews with staff using the **PICMoRS** approach. A range of business and patient processes were reviewed as per the assessment plan.

The assessment was conducted onsite.

### Summary Of Assessment Findings

Management and staff demonstrated a good understanding of their roles and responsibilities. The internal audit program was seen to be effectively planned to provide a platform for improving the systems and processes within the organisation.

There were no Not Met actions identified during the audit. The remainder of the actions were rated "Met", "Prescribed" or "Not Applicable". This was explained at the Closing meeting. Opportunities for improvement that would further strengthen the system were discussed throughout the assessment and at the closing meeting.

Assessment objectives were met	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
Number of NSQHSS actions identified as Not Met	Nil	
Number of NSQHSS actions identified as Met with Recommendations	Nil	
Actions Outstanding at Final Assessment	Nil	

### Recommendation and Next Assessment Date

Recommended for Interim NSQHS Standards Accreditation	Yes <input checked="" type="checkbox"/>	Pending* <input type="checkbox"/>	No <input type="checkbox"/>
Date for initial response to Not Met Actions	N/A		
Date for closeout of Not Met Actions	N/A		
Recommended date for next assessment	Within 12 months		
*Accreditation will not be recommended until all Not Met Actions have been closed out

## EFFECTIVENESS OF THE SAFETY AND QUALITY SYSTEM

### Description of the Operations including Changes to the System

Brisbane Procedure Centre (BPC) is a new purpose built facility providing surgical services for patients undergoing fertility treatment. BPC, under the umbrella of City Fertility and City Health Day Hospitals, is co-located with the RTAC licenced and accredited facility, City Fertility Brisbane. The facility consists of one theatre, one embryo transfer room, three stage 1 recovery trolleys and three stage 2 recliners, and a sterile storage area. With the exception of a reusable ultrasound transducer, single use equipment only is utilised.

A number of internal services such as human resources and on-boarding are integrated within the City Fertility management system (CFC Work Desk integrated data management system). There is also a National Compliance, Regulatory and Safety Manager who provides oversight of the quality management system. There is access to an external infection prevention and control consultant.

QLD Health licensing has been completed and the first procedure was undertaken on March 25<sup>th</sup>. BPC is licensed to perform oocyte collection, embryo transfer, hysteroscopy, termination of pregnancy and cervical procedures only. To date procedures have been performed under IV sedation and conscious sedation (Penthrox) only.

There are currently four permanent peri-operative staff available. Extra staffing is sourced from a nursing agency. There is also the ability to share some staff resources with Southside Procedure Centre, another City Health licensed facility located in Sunnybank QLD.

A significant amount of work has been undertaken to meet the requirements of both licensing and NSQHS Standards accreditation. The involvement and level of commitment displayed by all personnel during the assessment is to be commended. BPC is aware that interim accreditation only is granted at this stage and a further assessment is to be undertaken within twelve months at which time Not Applicable actions requested will also be reviewed.

### General Comment on Effectiveness of the Safety and Quality System

A documented clinical governance and safety and quality framework (1.10.2 Day Hospital and Procedure Centre Governance for Safety, Quality and Risk v2 24/2/2020) has been implemented. Oversight of BPC activities, in accordance with the clinical governance framework, have been outlined within 1.10.1 Clinical Governance – Governing Body v2 30/11/2020. The Medical Advisory Committee (combined Brisbane and Southside Procedure Centres) reports to the City Fertility/City Health Chief Executive Committee. The requirements of the NSQHS have been integrated into the quality management system infrastructure (Safety and Quality Manual QMS001 v19 10/11/2020). An Attestation Statement (that incorporates all City Health facilities) has been received for 2020/21.

Processes are in place to engage consumer and carer feedback on safety and quality systems currently being managed through one on one interviews or feedback surveys. As processes are generally similar across all City Health facilities consumer feedback has been used from other facilities to drive improvements for the group. A consumer representative for Brisbane has only just been appointed with formal orientation to be completed next week.

The capability and effectiveness of the governance system to ensure compliance with customer, statutory and regulatory requirements and meeting organisational objectives, although in its infancy, has been demonstrated.

Policies and procedures to support both business and clinical activities have been implemented. Monitoring of internal processes and compliance will be managed through the internal audit, risk and incident management programs (RiskClear).

With patients' permission, processes (to determine compliance with the NSQHS Standards) were observed from admission to discharge for patients undergoing procedures on April 8<sup>th</sup>.

Client: Brisbane Procedure Centre	Assessment Dates: April 7-8, 2021
Assessment Report: NSQHS Standards	PRJC-225666-2021-AST-AUS

Actions as required by Advisories AS18/10, AS18/14, AS18/15 and AS19/01 have been fully implemented. Actions related to AS18/11 (implementation of My Health Record) have commenced. Actions related to AS/NZS4187:2014 have been determined applicable to the reprocessing of ultrasound transducers only.

## NSQHSS COMPLIANCE SUMMARY

## PICMoRS Methodology

This assessment has been conducted utilising the PICMoRS Method.

**Process** – documentation on policies, procedures and processes throughout the facility have been reviewed for accuracy and currency. Staff observed were able to access information, be it hard copy or electronic. The goal is to maintain all documentation electronically.

**Improvement** – improvement strategies and how to determine the effectiveness of changes has been discussed. Patients are provided with a feedback tool to discuss the admission process in order to implement changes in these early days.

**Consumer** – consumer involvement in review or design of processes and the development of improvement strategies to date has been restricted to one-on-one discussions with a few patients with no specific feedback received. During the assessment a consumer had just agreed to be a representative for the facility and will commence reviewing information and particularly the website which is new.

**Monitoring** – ongoing monitoring strategies have been determined through the use of clinical indicator data that will be reported to the Medical Advisory Committee and also the Board.

Phone:	(02) 9900 9545	DNV Business Assurance Australia	Page 11 of 14
			CONFIDENTIAL
Email:	CertificationANZ@dnv.com		DNVNSQHS Exec Report (2 <sup>nd</sup> Ed)

Client: Brisbane Procedure Centre	Assessment Dates: April 7-8, 2021
Assessment Report: NSQHS Standards	PRJC-225666-2021-AST-AUS

Reporting – evidence of reporting of information has been demonstrated at this stage through sampling of Medical Advisory Committee meeting minutes (22/2/2021). RiskClear has also been introduced as a further means of reporting information such as internal audits, incidents, complaints and patient feedback.

Systems – integration of safety and quality systems has been evidenced through review of training and education programs and the development of policies that meet the needs of the facility.

### High Risk Scenarios

High risk scenarios have been discussed with staff, particularly the actions to be followed in the event of an emergency be it a medical or surgical event. Staff were able to provide video evidence of training in the evacuation of a patient in the event of an emergency. It is expected that training in other medical emergencies specific to fertility treatment such as Ovarian Hyperstimulation Syndrome and the signs to look for in the patient will be provided as well.

<b>Met</b>	All requirements of an action are fully met.
<b>Met with recommendations</b>	The requirements of an action are largely met across the health service organisation, with the exception of a minor part of the action in a specific service or location in the organisation, where additional implementation is required.  <i>Met with recommendations</i> may not be awarded at two consecutive assessments where the recommendation is made about the same service or location and the same action. In this case an action should be rated <i>not met</i> .  <i>Met with recommendations</i> may only be awarded at initial assessment if there are no other not met actions.
<b>Not met</b>	Part or all of the requirements of the action have not been met.
<b>Not applicable</b>	The action is not relevant in the service context being assessed.  The Commission's Advisory relating to <i>not applicable</i> actions for the relevant health sector need to be taken into consideration when awarding a <i>not applicable</i> rating and assessors must confirm the action is not relevant in the service context during the assessment visit.
<b>Not assessed</b>	Actions that are not part of the current assessment process and therefore not reviewed.

### ADDITIONAL REQUIREMENTS

#### Use of Marks and Logos

Not applicable for this assessment

#### Unresolved Issues

Nil recorded

#### Justification for Use of One Auditor

- Size and complexity of the organisation warrants use of single auditor for this audit.  
 N/A

#### Progress toward implementation of AS/NZS 4187:2014 (as amended February 2021)

Gap Analysis completed and level of compliance with AS/NZS 4187:2014 determined?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
Implementation plan, including timeline, established?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>

Implementation plan, including timeline, revised?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
Progress on implementation in accordance with plan	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
Auditor comments on implementation plan: Single use items only are utilised in the procedure room. There is no method for sterilising available onsite. The only RMD available is limited to a transvaginal ultrasound transducer. Disinfection methods have been implemented and were observed.			

## CONCLUSION

The assessment determined that the Management System satisfies the requirements for Interim Accreditation to the National Safety and Quality Health Service Standards.

It is considered that **Brisbane Procedure Centre** has the capability to systematically meet agreed requirements for activities within the current scope of Accreditation and at the location covered on the certificate.

I would like to thank the staff for the assistance given to the team during the audit and for choosing DNV to be partners with you in the accreditation of your safety and quality system. Our aim is to ensure your safety and quality remains effective and efficient and can adapt to the changing needs of the organisation to ensure quality outcomes for everyone involved.

I look forward to seeing everyone again at the next scheduled visit.

### Disclaimer

Some issues, non-compliances or required improvements within the organisation may not have been identified in this report, due to the sampling size and time available during the audit. The organisation's management is responsible for implementing a surveillance system (based on internal audits) to identify nonconformities/continuous improvement opportunities and to take the necessary controls to ensure the quality management system implemented is effective and meets organisational and regulatory requirements.

### Confidentiality Statement

DNV its employees, assessors and contractors, shall keep all information relating to your organisation collected during this audit confidential, and shall not disclose any such information to any third party, except that as required by legislation or relevant accreditation bodies.

DNV its employees, assessors and contractors and accreditation bodies have signed confidentiality agreements and will only receive confidential information as per the requirement of the standards being audited.

Please note that all our assessors are under instruction to destroy all audit evidence held on portable electronic devices once the report is concluded.

### Reproduction of this Report

This assessment report shall not be reproduced except in full and with the written permission of DNV and the report's recipient(s).
